

## **Our scissors are improved.**

STALEKS technologists are in contact with nail stylists and beauty industry experts. The result of research and communication with professionals has turned into an improved tool, cut out for the actual needs of the nail technicians. These scissors have become even more ergonomic, the working parts are thinner, and the sharpening is ideal. The company has implemented all its best developments in new models. Among them, both classic scissors shape and unique innovations of the company, such as a hook at the tip, curved handles, and extended rings with silicone inserts. The scissors are suitable for any technique. A nail stylist of various skill levels will be able to choose a new model for themselves among the modern line of STALEKS PRO scissors.
